

Muhammad Waqas Anjum

+92-308-0425989 mr.waqasjafri@gmail.com muhammad-waqas-anjum Islamabad, Pakistan

SUMMARY

Full Stack Software Engineer with 1+ years of experience in developing web applications using React.js, Node.js, and NestJS. Skilled in building REST APIs, real-time features, and secure backend systems using JWT, OAuth, and RBAC. Familiar with designing scalable SaaS applications and working with databases like MongoDB and PostgreSQL. Comfortable with cloud services such as AWS and Azure and focused on writing clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+) | TypeScript | SQL
Frontend: React.js | Redux | Vite | Tailwind CSS | Material UI
Backend: Node.js | NestJS | Express.js | REST APIs | GraphQL | Socket.io | WebSockets
Databases: PostgreSQL | MongoDB | MySQL | Prisma ORM
Cloud & DevOps: AWS (S3, EC2) | Azure OpenAI | GitHub Actions | CI/CD
Security & Design: RBAC | JWT | OAuth 2.0 | API Design | Multi-Tenant Architecture

EXPERIENCE

Software Engineer — Full Stack Feb 2026 – Present
Softoo Technologies Islamabad, Pakistan

- Engineered backend services for 3 concurrent production systems using NestJS, PostgreSQL, and Prisma, improving system scalability and maintainability
- Developed RAG-based AI chat system using Azure OpenAI with real-time streaming via Socket.io, enabling interactive document-based querying
- Designed and implemented multi-level approval workflow engine for a national government platform (FAB Pakistan)
- Implemented secure authentication and authorization (RBAC, JWT, OAuth) across multi-tenant systems
- Built analytics dashboards and export systems (PDF/CSV) for enterprise users, enhancing reporting capabilities
- Automated deployment pipelines using GitHub Actions, improving development and release efficiency

Software Engineer Intern — Full Stack Oct 2025 – Jan 2026
Softoo Technologies Islamabad, Pakistan

- Developed reusable React.js components and Node.js APIs integrated into production systems
- Built responsive UI modules with MongoDB backend in an agile development environment

Backend Developer (Intern) Aug 2024 – Oct 2024
DevelopersHub Corporation Remote

- Developed REST APIs and optimized database queries, improving backend performance and response times
- Built scalable backend services following clean architecture and best coding practices

PROJECTS

TNAai | AI SaaS Platform | React.js, NestJS, RAG, Azure OpenAI *Production*

- Built AI SaaS platform enabling document-based chat using RAG architecture
- Implemented real-time messaging system with analytics dashboards and feedback tracking
- Designed multi-tenant architecture with export features (PDF/CSV) for enterprise users

FAB Pakistan | Government Portal | NestJS, PostgreSQL *Production*

- Developed backend for national frequency allocation system used by regulatory authorities
- Implemented complex approval workflows and role-based access control mechanisms

Prop-Log | Property Management Platform | React.js, Node.js *Production*

- Built property management modules with secure authentication and role-based access
- Implemented CI/CD pipelines to automate deployment and improve release cycles

Auto Business Builder | AI Startup Kit Generator | React, NestJS, MongoDB, Groq AI *Personal Project*

- Built AI-driven platform to generate complete business plans, marketing strategies, and landing pages from user input
- Designed modular 3-tier architecture with dedicated AI service for structured output generation

- Implemented multi-tenant system with JWT authentication and organization-level project management
- Integrated Groq (Llama 3.3) for high-performance AI content generation

AutoDev AI | *AI Infrastructure Builder* | React, NestJS, Prisma, PostgreSQL, Stripe *Personal Project*

- Developed AI platform to generate backend architectures, APIs, and database schemas from prompts
- Implemented tier-based access system with Stripe integration for subscription management
- Built real-time generation pipeline using WebSockets for live AI progress streaming
- Integrated AI engines (OpenAI/Groq) for automated infrastructure and code generation

FinOps Auditor | Next.js 15, TypeScript, Prisma, AWS SDK *Personal Project*

- Built cloud cost optimization platform to identify and eliminate unused AWS resources
- Implemented dual-mode scanning (Live AWS APIs + Cost & Usage Reports)
- Developed AI-powered recommendation engine for cost-saving insights
- Designed ROI-focused dashboards with historical trend analysis

EDUCATION

Minhaj University Lahore
BS Computer Science

Lahore, Pakistan
2020 – 2024

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Node.js & Deno.js Mastery
- Software Engineering Fundamentals
